

Flush Mounted, Fire Rated Corner Guard, 2" Wing (50mm)

Features

- Standard Lengths are 4' (1.2m) and 8' (2.4m).
- Rigid PVC Tensile Yield, 6100 psi as specified in ASTM D-638, wall thickness .080. (PETG if applicable CNDD)
- Chemical and Stain Resistance in accordance with ASTM D-543.
- Fungal and Bacterial Resistance in accordance with ASTM G-21 and ASTM G-22.
- Aluminum Retainers are extruded from 6063-T5 alloy, tensile strength of 29,000 psi, a yield strength of 25,000 psi, an elongation (% on 2" (50mm)) of 12 and a Brinell Hardness of 73.
- Class "A" Fire Rating.

Quick Installation

Flush Mounted Corner Guard systems are intended for outside corners in wall assemblies consisting of minimum 3-1/2" (89mm) deep steel channel stud framing framing faced on each side with a minimum of one (1) layer of nominal 5/8" (16mm) thick gypsum wallboard. Field trimming may be required to obtain exact desired height/length.

Order Guide

Please refer to the Tepromark Order Guide for instructions on how to order specific lengths and colors for this product. This can be found in the back of your Tepromark catalog or on the website.
