

Wood Chair Rail 3-1/4" (83mm)

Features

- Random Lengths are 6' (1.8m) to 12' (3.6m) in length and include mounting brackets. Available in 5 different types of wood, finished, unfinished or primed.
- Easy to install with screws, decorative inserts cover attachment hardware.
- A range of standard and special 1-1/4" (31mm) trim inserts are available to order. These need to be ordered separately as a different line item.

Quick Installation

Chair rail shall be secured to the wall by bolts or screws which will be located within the groove area of the chair rail. All fasteners are to be of appropriate size, type and counter bored as required to ensure positive and permanent attachment. Fasteners are not to exceed 32" (812mm) O.C.. After the chair rail is secured to the wall, decorative inserts shall be installed to cover wall fastening using 15 gauge or smaller finish nails or adhesive. All visible fasteners, seams, joints, etc. shall be touched up following installation.

Order Guide

Please refer to the Tepromark Order Guide for instructions on how to order specific lengths, inserts and finishes for this product. This can be found in the back of your Tepromark catalog or on the website.
